

# Maksym Medvediev

## Personal info

---

**Date of birth:** 27/09/1997  
**Nationality:** Ukrainian  
**Address:** Odessa, Ukraine  
**Phone number:** +380501643943  
**Email address:** medmmmax@gmail.com  
**Web:** <https://github.com/A1doranM>  
**Skype:** live:f5d8752ce8d90d5c

## Profile

---

I want to continue my career in information technology and become a professional in my field. In addition to improving the skills of JavaScript, HTML, CSS and Front-end development. I am also well acquainted with Java, Flutter, Dart, Android development, code understanding in C++ and Python.

## Work experience

---

09/2016 – 01/2017  
Odessa, Ukraine

### **Java and JavaScript developer in Hillel Evo education programm Hillel**

There is experience in developing the Back-end part for the AristoPets (pet search site) site within the HillelEvo program using Java, Spring, Hibernate, MySQL, Git, JavaScript.

01/2018 – 02/2018  
Odessa, Ukraine

### **PythonDeveloper Joint project of ONPU and Augsburg university. "Neurobotics" Odessa Ukraine**

Aims of our project was to train self-driving car with OpenCV and neural network. I learned OpenCV framework, and prepared data for training neural network.

01/2018 – 02/2019  
Odessa, Ukraine

### **Java and Androidl internship Luxoft**

Development and presentation of the Android application with the organization of the development process by the Agile methodology. The project was to create an application for snowboarders and those who want to become them.

10/2019 – 11/2020  
Odessa, Ukraine

### **Front-end web developer, Android (Java) developer, Android (Dart/Flutter) developer DigitalMaker**

As a react developer, I worked on the front-end part of several sites, unfortunately the projects were suspended due to the coronavirus. Then I was transferred to mobile development, successfully mastered Dart and Flutter, and a project for Bosch was released. The next stage was the development of Android applications using Java, which he also successfully mastered (projects have not yet been released to the market). All this time I also worked on projects on React, and React Native.
