Profile

I want to continue my career in information technology, growing as a specialist in my field. In addition to improving Frontend Development skills. I also continue to improve my skills in backend, database, software architecture, mathematics and algorithms.

Work experience

05/2023 – now

Software Developer

Phobosys / Dreamhost

As Full-Stack developer I was working on dreamhost website (<https://www.dreamhost.com/>) in Microfrontends + Microservices environment and website management system using Python, React, Redux, PropTypes i18next on front-end and NodeJS, Typescript, AWS-SDK, inversify, express on back-end as well as Open AI API, Anthropic API, LangChain and LangGraph for AI management.

Work experience

04/2024 – 11/2024

Senior Software Developer

Hearty App

Working as Full-Stack (Node, React, Python, NextJS) and Mobile (Flutter/Dart) developer on Hearty Application for kids and their parents. Including Open AI agent for story telling and intellectual search system.

<https://apps.apple.com/ua/app/hearty-app-everyday-bonding/id1567076603?l=ru>

09/2022 – 03/2023

Senior Software Developer

Moohii

As React, and Next.js developer I was working on couple of Ukraine government projects from September 2022 to March 2023 which will be the part of the Dia ecosystem.

- First it is online eco-certificate for Ukraine Ministry of Ecology for extraction and delivery of timber. (<https://eco.gov.ua/services/sertifikat-pro-pohodzhennya-lisomaterialiv-ta-vigotovlenih-z-nih-pilomaterialiv>)
- Second it is drova-e website as part of Dia ecosystem where timber companies can sell firewood, and the population can buy it. (<https://drovae.gov.ua/>)

04/2022 – 08/2022

Software engineer

PlayTech

I worked on the front-end part of CMS system and portal for this system using React, Redux and WebSockets.

Work experience

01/2021 – 04/2022

Software engineer

Exadel

As a developer, I worked on the part of several sites, one of them was inner company project about workers assessment based on React and Express with MySQL, another one was ABC Fitness Solutions project for managing fitness clubs. (React and Java with JSP + MySQL)

10/2019 – 11/2020

Full-stack web developer, Android (Java) developer, Android (Dart/Flutter) developer DigitalMaker

Developed advertising platform using React and NestJS and PostgreSQL.

Created Flutter and native Android mobile Apps with NestJS and Python on backend and Firebase

01/2018 – 02/2019

Java and Android Internship

Luxoft

Development and presentation of the Android application with development organization process according to Agile methodology. The project was to create an application for snowboarders and those who want to become one of them.

01/2018 – 02/2019

PythonDeveloper

Joint project of ONPU and Augsburg university. "Neurobotics" Odessa

Aims of our project was to train self-driving car with OpenCV and neural network. I learned OpenCV framework, and prepared data for training neural network.

Skills

LANGUAGES:

English - B2	Ukrainian - Native
Deutsch - B1	Russian - Native

SOFTWARE DEVELOPING:

JavaScript	React/Redux	SQL	Nest
SASS	NodeJS	PostgreSQL	Next.js
Prisma ORM	Git	REST	Rollup
Graph QL	JWT	Webpack	Storybook
Redis	Bootstrap	RDF/RQDFS	JEST, Enzyme
Python	FastAPI	SQLAlchemy	

DEPLOYMENT:

AWS Docker Kubernetes

PROCESSES:

Agile SCRUM

METHODOLOGIES AND PRINCIPLES:

BEM SOLID GRASP GOF

Education

09/2015 – 11/2020

Software engineering | Master of Science
Odessa National Polytechnic University
